

Over 75 people responded to the December and January announcements for the new Field Scholarship Program. To be evaluated by our selection committee, potential recipients had to apply to the World Water Corps (division of Water For People) and be accepted for a work assignment. After that initial step, and a review of the applicants against the Field Scholarship criteria, there were 22 candidates to be considered for field scholarships. Five recipients have been selected and contacted and have agreed to be participants in the Field Scholarship program. The recipients originate from Tallahassee, Orlando, Miami, Aventura, and Gainesville. The scholarship amounts range from \$500 to \$2500 and cover 3 students and 2 young professionals. The work assignments will involve trips to Guatemala, Bolivia, Ecuador, and Malawi. The trips will take place in 4th quarter of this calendar year.
