

Understanding Florida's NEW Stormwater Quality Criteria

The hottest topic for Florida engineers involved in the design of stormwater management systems
Thursday, September 23, 2010
Westin Lake Mary, Orlando North
Lake Mary

Florida engineers involved in the design of stormwater management systems will learn what practices will be emphasized in meeting Florida's new stormwater quality criteria.

For a [detailed course description and complete agenda](#) click [here](#).

Featured topics and presenters:

History of Stormwater Quality Management – Eric H. Livingston; FDEP

Rainfall, Runoff and Loading – Harvey H. Harper, PhD, PE; Environmental Research & Design

Geotechnical Factors in Designing BMPs – Devo Seereeram, PhD, PE; Devo Engineering

Stormwater Quality BMPs – Their potential use in addressing existing and proposed stormwater regulations – Henry H. Higginbotham, Jr, PE; SWFWMD

The Big Picture of TMDLs and BMAPs – Gordon England, PE, D.WRE; Stormwater Solutions

How Local Governments Can Plan and Implement Stormwater Improvements Projects Focusing on Stormwater Quality - Damon M. Meiers, PE; SFWMD

FES is FBPE-approved Provider #0003823

5 PDHs technical area of practice credits valid for FL PE License renewal

Early Bird Registration Fees – Register online at this [link](#).

Until September 8th - \$275 FES/FICE Members
\$375 Non-members

After September 8th - \$325 FES/FICE Members
\$425 Non-members
