

FEE

Florida Engineers in Education

The Florida Engineers in Education represents members who are engaged in teaching, research, or administration in the field of education. Any member of FES may participate in the activities of this section subject to the FEE Rules of Government and Operations.

The objectives of the section are to provide for professional engineers in education a forum for effective discussion, exploration, and analysis, and provide for FES and NSPE a vehicle for obtaining advice by professional engineers in education with respect to:

1. Improvement of undergraduate, graduate, continuing education, and technician programs for accomplishing the engineering effort of our nation.
2. Stimulation of professional concepts, including registration among engineering educators and students.
3. Cooperation with the American Society for Engineering Education, the Accreditation Board for Engineering and Technology and other engineering societies in matters affecting educational policies and practices.
4. Promotion of an atmosphere for engineering educators conducive to the highest quality of engineering education.

FEE's efforts help to shape the future of engineering.

Duties

Members are asked to participate in meetings, support the Student Professional Development Committee, and provide support to the student chapters.

Volunteer Time Commitment

A maximum of one hour a month is requested for meetings and to distribute information back to the chapters.

Committee Meetings

Meetings are called on an as needed basis, conducted via conference call, and last one hour.
